PROJECTS

Website Sentiment *Python 3, Ngrams, TF-IDF vectorizer, Naive Bayes Classification*

<https://github.com/yoonpatrick3/website-sentiment>

Allows user to input a website URL and it will output a number that represents that overall sentiment of that site.

Pathfinding Algorithm Visualization *Javascript*

<https://github.com/yoonpatrick3/pathfinding-algorithm>

Visualizes BFS, DFS, and A* search algorithm by setting a starting and end point within a generated maze. Also developed a bot for the classic game snake using A* search algorithm.

Stumbl *HTML/CSS/JavaScript, PHP, MySQL, Datamuse API*

<https://github.com/yoonpatrick3/stumbl>

Allows users to input various preferences, such as favorite movie and music genre and finds other users with similar interests.

Kpopy *Python 3, Jupyter Notebook, Selenium, JSON*

<https://pypi.org/project/kpopy/>

Python API that gathers thousands of information on Korean Artists
